

DemandGentic.ai Solution Brief

The AI-Powered Demand Generation Platform by Pivotal B2B

Executive Summary

In today's B2B landscape, marketers face overwhelming algorithmic noise, decaying data quality, and inefficient campaigns that fail to reach the right decision-makers. Traditional volume-based approaches generate spam, waste resources, and miss genuine opportunities. DemandGentic.ai, Pivotal B2B's proprietary AI platform, transforms demand generation by replacing spam with intelligence-driven, account-aware engagement.

Our platform combines three core pillars: **human expertise** from seasoned strategists, **autonomous AI agents** for research and execution, and access to **70M+ verified contacts** with 98% accuracy. This unique combination enables precision targeting, context-aware messaging, and measurable ROI through AI-led ABM, content demand distribution, and autonomous SDR outreach.

By leveraging agentic reasoning and a massive contact database, DemandGentic.ai helps B2B companies overcome lead quality challenges, optimize campaign performance, and drive real business outcomes while maintaining the highest compliance and ethical engagement standards.

The Problem: Algorithmic Noise & Inefficient Demand

B2B marketers today face three critical challenges:

- The Noise Problem:** Buyers are overwhelmed by volume-based spam from generic automation tools, with irrelevant messages drowning out genuine solutions.
- The Data Decay Challenge:** 30% of B2B contact data decays annually, leading to wasted resources on outdated or inaccurate information.
- The Context Gap:** Even valuable solutions fail to reach the right audience due to a lack of account intelligence and poor timing.

These issues result in low-quality leads, inefficient resource allocation, and missed revenue opportunities. Traditional tools focus on vanity metrics rather than meaningful engagement, creating a cycle of waste and frustration.

Our Solution: AI-Driven Demand with Agentic Intelligence

DemandGentic.ai transforms demand generation through a three-pillar approach: **Human Expertise + AI Agents + Global Data.**

1. **Human-Led Strategy:** Seasoned demand generation strategists design and monitor campaigns, ensuring alignment with business objectives and market dynamics.
2. **Autonomous AI Execution:** AI agents handle research, voice outreach, email sequencing, and compliance—thinking and reasoning rather than just automating tasks.
3. **Verified Contact Intelligence:** Access to 70M+ verified contacts with 98% accuracy provides the foundation for precision targeting and account-aware engagement.

Our platform operates on four core principles:

- **Permission is Earned:** We prove value in every interaction.
- **Context Over Content:** Relevancy and timing matter more than just “good copy.”
- **Data is Evidence:** We verify facts and attribute sources—no hallucinations.
- **Judgment at Scale:** Our AI thinks and reasons, it doesn't just automate tasks.

Key Capabilities

AI-Led Account-Based Marketing (ABM)

- Cross-channel orchestration across email, voice, and social.
- Buying committee mapping and engagement tracking.
- Account-specific messaging and timing optimization.

Content Demand Distribution

- Intelligent asset distribution based on prospect intent signals.
- High-intent qualification through engagement analysis.
- Content performance tracking and optimization.

AI SDR (Sales Development Representative)

- Autonomous first-touch outreach with natural language processing.
- Meeting booking and calendar coordination with warm handoffs.
- Real-time conversation adaptation and objection handling.

BANT-Qualified Appointments & Intelligence

- Budget, Authority, Need, and Timeline qualification.
- Deep account and contact research with verified data sources.
- GTM strategy support and competitive intelligence.

Benefits and Measurable ROI

We deliver quantifiable business outcomes and strategic advantages.

- **52.7% Lead Qualification Rate**
based on recent campaign data.
- **51.8% Email Click-Through Rate**
on opened emails.
- **100% ICP Account Alignment**
with verified buying criteria.
- **98% Data Accuracy**
across 70M+ verified contacts.

Strategic Advantages:

1. **End Algorithmic Noise:** Replace spam with intelligent engagement that builds trust.
2. **Optimize Resource Allocation:** Focus resources on high-intent prospects with verified data.
3. **Accelerate Sales Cycles:** Deliver BANT-qualified appointments and warm handoffs to reduce time-to-conversion.
4. **Maintain Compliance Confidence:** Built-in compliance with TCPA, GDPR, and CCPA.
5. **Scale with Intelligence:** Autonomous AI agents handle execution while humans focus on strategy.

Implementation Approach: Your 90-Day Transformation

Our five-step process ensures seamless integration and rapid value realization, with most clients seeing initial results within 30 days.

Step 1: Discovery & Strategy - Define ICP, target accounts, and success metrics.

Step 2: Intelligence Activation - AI agents research and verify targets, mapping buying committees.

Step 3: Precision Content Development - Generate context-aware messaging for each channel.

Step 4: Agentic Execution - Deploy Voice and Email agents for autonomous, multi-channel outreach.

Step 5: Optimization & Handoff - Deliver qualified leads with full context and refine campaigns.

Use Cases and Success Patterns

Enterprise Technology Company

Challenge: Low lead quality from traditional marketing automation.

Solution: Implemented AI-Led ABM with buying committee mapping across 200 target

accounts.

Results: 68% increase in qualified leads, 42% reduction in sales cycle time, and 3.2x ROI within 6 months.

B2B SaaS Scale-Up

Challenge: Limited resources to generate enough pipeline for aggressive growth.

Solution: Deployed AI SDR for autonomous outreach and content demand distribution.

Results: 215% increase in meeting bookings and a 47% lower cost per qualified lead.
